

## Minutes of Beneficiaries meeting

**Date:** 9<sup>th</sup> of October /2019

**Place:** Cooperative producers of Arborea, Arborea (CA)

**Subject:** Innovative ammonia stripping plant for fertiliser extraction from animals sludges and nitrate on groundwater reduction

### Attendees:

Institute	Participants
<b>MEDISS Staff</b>	Mrs. Maria Dessena - ENAS Mr. Amedeo Fadda- ENAS Mr. Ignazio Ghironi- ENAS Mr. Giovanni Sistu
<b>Menaware Staff</b>	Prof. Pierpaolo Roggero Mr. Alberto Carletti
<b>Beneficiaries</b>	CPA President CPA General Director Agronomic Consultant Agronomist of CPA Members of Coop. Producers of Arborea (CPA)

The first meeting was finalized to explain very well the project and its objectives, both general and strategic. The coordinator of the project from Enas and from CRENoS explain to beneficiaries the aims and the goals of MEDISS interventions on 4 sites in the Mediterranean area.

The benefit and the innovative application was detailed and we spoke a lot about the real needs of the Cooperative in terms of agricultural and livestock management and in terms of water and soil protection in this vulnerable area for nitrate pollution. Enas showed the ammonia stripping purposes and its advantages to extract fertilizer and reduce the charge of ammonia in the sludges produced.

In the very close area another project is coming: the Menaware project

During the meeting, we did also the program of the activity of the two days of KoM and the visit to the Cooperative in Arborea.

The Beneficiaries agree very much the MEDISS challenges and they have a very good impression about the real possibilities of the application in the area of Arborea, in particular, the advantages for the Cooperative members in the future. They expressed readiness to help and support the MEDISS group during the implementation of the project. The project was presented by the President during the own General Assembly of the Cooperative.
